The network simulator is discrete event packet level simulator. Network simulator is a package of tools that simulates behavior of networks such as creating network topologies, log events that happen under any load, analyze the events and understand the network. Well the main aim this STTP is to learn how to use network simulator and to get acquainted with the simulated objects and understand the operations of network simulation, we also need to analyze the behavior of the simulation object using network simulation.

## COURSE CONTENTS

- Introduction to NS2.
- Learning NS2 programming and practicing.
- Graphical simulation of nodes and data traffic.
- Simulating different routing protocols.
- Wired and wireless routing protocols...
- Wired network simulation.
- Mobile network simulation
- Working with Trace file.
- Output graphs from Trace file.
- Adding new protocol.
