EDITORIAL:

The Dept. Of Mechanical Engineering is actively working for the fulfillment of the MISSION & the VISION of the college and we have succeeded to a certain extent.

This issue of the newsletter has fascinating details about the events, achievements, results & future planning of Mechanical Engineering Department.

FROM HOD'S DESK

Mechanical engineering is a creative discipline, drawing on basic sciences to design devices, machines, processes and systems that involve mechanical work and its conversion from, and into, different forms of energy, including advanced automotive propulsion systems. The department allows ready access to research programs during the early years of education, permitting rich opportunities to combine theory and practice in order to produce a well balanced and highly recruited engineering graduate.

Our respected, full-time faculty members teach the majority of the classes taken by our undergraduates, providing the proper balance of sound basic knowledge and cutting edge technological insight necessary to produce strong technological leaders.
